

58. {NEW} The liquid crystal display device of claim 50, wherein a refractive index anisotropy $\Delta n(550)$ of a liquid crystal material of the liquid crystal layer for light having a wavelength of 550 nm is in a range of $0.060\Delta n(550) < 0.120$.

59. {NEW} The liquid crystal display device of claim 50, wherein the phase compensation element is arranged so that b-axis forms an angle in a range of 15° to 75° with respect to a layer normal of the liquid crystal layer.

60. {NEW} The liquid crystal display device of claim 50, wherein $(n_a - n_b) \times d$ is in a range of 80 nm to 250 nm, where d denotes a thickness of the phase compensation element in a layer normal direction of the liquid crystal layer.

REMARKS

Entry of this Preliminary Amendment is respectfully requested.

The Commissioner is authorized to charge the undersigned's deposit account #14-1140 in whatever amount is necessary for entry of these papers and the continued pendency of the captioned application.

Respectfully submitted,

NIXON & VANDERHYE P.C.
